

# Improving Communication Skills in English for Study and Career in Transport Technologies and Logistics Engineering

Vinnitsia National Technical University

## **Анотація**

*У статті розглядаються переваги вивчення англійської мови для майбутніх спеціалістів транспортно-логістичної інженерії. Підкреслюється важливість розвитку комунікативної та мовної компетентцій в галузі науки та транспортних технологій*

**Ключові слова:** логістика, бізнес, ділове англійська мова, ділове листування, професійні терміни, економічна ефективність, технічні ресурси, менеджмент

## **Abstract**

*The article considers benefits of learning English for the future specialists in Transport and Logistics Engineering. The importance of developing communicate and Language competence in English for Science and Technology in the language classroom is emphasized.*

**Key-words:** logistics engineering, Business English, business correspondence, professional terms, economic efficiency, technical resources, management

## **Introduction**

Professional English course in Transport Technologies and Logistics Engineering focuses on a wide range of key business and management concepts, has a clear grammatical structure and a systematic approach to vocabulary building. The students of Business English need to deal effectively with different kinds of official documents, legal contracts and other recent developments in communication technology.

## **Basics**

A high level of English is a significant advantage for logistics engineers as most global companies have chosen it as an official language to achieve business goals. In turn, organizations that do not use it significantly lose to their competitors and limit their own growth opportunities. Business English in Transport Technologies and Logistics Engineering allows you to solve the following tasks: communication and effective cooperation of employees from different countries; conducting business correspondence; signing large business agreements; coordination of supplies; regulation of business processes.

Increasing students' facility in communicating has had the effect of elevating the importance of vocabulary learning in recent years. The leading language teaching methodologies provided research-based activities of vocabulary teaching and learning with application to integrated study skills.

The popularity of English for logistics engineers is growing every year. This is confirmed by the number of new electronic dictionaries, textbooks, articles and studies devoted to this topic. Logistics engineers review and design logistics operations, improve companies operational efficiency and reduce cost. The job of a logistics engineer is to handle everything related to a supply management system.

In order to be educated in the desired field, you need to know the terminology and study the relevant materials. From the point of view of updating professional terms, there are several main areas that specialists studying Business English should pay special attention to. The task is to promote competence in terminology learning and to enrich the students' vocabulary in scientific and technical terminology while supporting and grammar skills acquired in studying English for Specific Purposes.

There are suggested the main directions of Business English vocabulary learning in the field of Logistics Engineering.

Types of purchase products.

The goal of procurement logistics is adequate and full satisfaction of production needs in materials with the maximum possible economic efficiency.

Interaction with suppliers.

- management of the disposition of material and technical resources, i.e. inventory management;
- regular analysis, selection and organization of supplies of material and technical resources to the enterprise, i.e. supply management.

Procurement budget management.

- Making decisions: regarding purchases or own production of material and technical resources; when choosing suppliers.
- Planning: operational and strategic needs of the enterprise in material and technical resources; the size of deliveries and terms of material and technical procurement resources; transportation and storage of purchased material and technical resources.
- Motivation of employees of the company's logistics service and suppliers.
- Control: the size of deliveries and the terms of procurement of material and technical resources.

Multitasking is one of the most important skills for logistics engineers. The English language allows you to solve important issues faster and more efficiently.

### **Conclusion**

To conclude, the goal of Professional English is to develop language skills and competence in Business English, to increase the learners' vocabulary, especially in business and management terminology. English is mandatory for the students of Transport Technologies and Logistics Engineering specialties as knowing the language not only allows you to develop your outlook, but also expands the perspectives and the circle of communication in which you are and gives a great chance to get into the company of your dreams.
