**Keywords:** language, the most common foreign language, international level, primary language of the press, international tool, language of information technology.

## Introduction

Language is our primary source of communication. It's the method through which we share our ideas and thoughts with others. Not only English speaking countries use English as a communication tool. There are thousands of languages in this world. Currently, English is the primary language of not only countries actively touched by British imperialism, but also many business and cultural spheres dominated by those countries. It is the language of Hollywood and the language of international banking and business. As such, it is a useful and even necessary language to know.

We know that English is the most understood language today, with 2 billion speakers across the world. English has become so popular that about 400 million people worldwide know it.

English is not just the most common language: it's also the most important one for you to learn for many reasons. With 2 billion speakers worldwide, English is the largest language by the number of speakers. It is also the third largest language by the number of native speakers.

As the most common language, English has the power of connecting people from many different cultures, building relationships and understanding.

## Research results

There are several factors that make the English language essential to communication in our current time. First of all, it is the most common foreign language. This means that two people who come from different countries (for example, a Mexican and a Swede) usually use English as a common language to communicate. That's why everyone needs to learn the language in order to get in touch on an international level. Speaking it will help you communicate with people from countries all over the world, not just English-speaking ones.

English is also essential to the field of education. In many countries, children are taught and encouraged to learn English as a second language. Even in countries where it is not an official language, such as the Netherlands or Sweden, we will find many syllabi in science and engineering are written in English. Because it is the dominant language in the sciences, most of the research and studies you find in any given scientific field will be written in it as well. At the

university level, students in many countries study almost all their subjects in English in order to make the material more accessible to international students.

On the Internet, the majority of websites are written and created in English. Even sites in other languages often give you the option to translate the site. It's the primary language of the press: more newspapers and books are written in English than in any other language, and no matter where in the world you are, you will find some of these books and newspapers available. In fact, because it is so dominant in international communication, you will find more information regarding nearly every subject if you can speak this language.

English has changed from just a language of communication to an international tool for success. With its help, professionals unlock doors to incredible opportunities. Like a key, the English language is included in areas of activity where it is impossible to do without it. The need for global communication drives the increasing demand for professionals with English language skills. In various fields, from technology to medicine, communicating in English is necessary for successful interaction with colleagues and clients worldwide.

Partnerships and businesses are also intricately linked to proficiency in the English language. It is the language in which agreements are forged, innovations are born, and global ideas are realized. In areas where English is crucial, including finance, information technology, and international diplomacy, mastering this language guarantees effective communication and success.

English is essential for getting a good job and better salaries. Multinational business organizations and many international corporations ask for people who have a good working knowledge of English. Even job advertisements in the local market also require English knowing people. People who go abroad for work also need to know English. English is a need for a variety of jobs as an air hostess, pilot, travel guide, media manager, etc. For Information: In today's world of the information superhighway, English is essential for getting easy access to any information. Almost any information is available in English. English is the language of information technology and the internet.

### Conclusions

So, we can conclude that the English language is important and necessary in the modern world. English is considered the global language of business, science and communication. Knowledge of the English language is mandatory for employment in high-paying positions. Therefore, it is necessary to study English in order to use it freely.
